

IMG Update for 30 August 2011

- ❖ The Interim Management Group met last night and continued project planning for the Golden Bay integrated family health centre.
- ❖ There are no planned changes to the building – rest home facilities will remain an integral part of the project.
- ❖ We are assembling the necessary information to apply for a resource consent from Tasman District Council
- ❖ Once that information is ready we will hold an Open Day. We are planning a model of the building layout and some sketches so people can get a good understanding of what the building will be like.
- ❖ We're continuing to work on financial arrangements including both fund raising and mortgage financing.
- ❖ The PHO is progressing the recruitment of a service director to run the Golden Bay health services at the new facility and will soon be interviewing those on the short list. All candidates have a strong health background.
